CONDITION OF STAMPS IN COLLECTIONS & ACCUMULATIONS:

- Any such lots may contain some material with faults, which is taken into account when setting the reserves & estimates on such lots.
- Description of condition of such lots is on the basis of what is the prevailing condition of the material ie: "Mostly F-VF" means some faulty items as well. Our descriptions will usually not specify the condition of individual items included in collection lots, nor will we specifically mention any faults/defects that they might have.
- As with all public auctions; collections, accumulations & mixed lots are not returnable for any reason.
- We encourage bidders to view such larger lots before auction, have somebody view for them, or ask us for extra information.
- We are always happy to answer any queries about specific stamps that are in a particular lot & their condition and/or provide scans of better items.
- Also, we are happy for bidders to phone us during the viewing times (but not on auction day!) and ask for expanded description of any lots. One of our describers will then take out the lot and go through it with you on the phone answering any questions about contents, condition etc.

CONDITION OF COVERS / CARDS etc:

Postally used covers/cards can be expected to show some wear consistent with their age and travel through the mails such as filing folds, backflap or edge faults from opening, slight reductions etc. Unless severe or affecting stamps, these will not be mentioned, and are not grounds for returns.

(In November 1882 the new Stamp Duties act made both embossed & adhesive stamps valid for all purposes. This meant that in addition to the St George & Dragon, & small Platypus adhesive stamp duty issues, the large Platypus embossed Stamp Duty designs were also officially authorised for postal use, although that might not have been the plan of the postal authorities. Thus the Platypus embossed issues could be legally used on postal articles, & examples of the 1d, 2d & 6d values are known, with only several of each recorded used, although their creation & usage is somewhat shouded in mystery). Superb fresh MUH with pristine never hinged original gum. This set was fully prepared for issue with details of stamp designs published by China Post and preliminary distribution was done to post offices. However, the published designs got heavily criticised that some of the goldfish pictured had actually Japanese species names, and not Chinese ones! Therefore, due to the political fallout, government decision was made to totally cancel the issue, and strict orders were given for all stocks to be returned & officially destroyed. In China all stamp sheets & philatelic sale products have individual serial nos, according to which full accounting can be made, and potential penalties are very severe. Therefore, only several sets are recorded as surviving, which originated from damaged presentation packs.
